## **Collaboration agreement between CTTS and Plumettaz for the training of the Plumett machines**

**Lincoln (UK), June 2010** - CTTS are proud to announce the collaboration of global training support to the Plumettaz Cable Jetting product range. This comes in recognition of CTTS's quality systems approach to training across Europe. CTTS is a recognised Centre of Excellence for Telecommunications and Fibre Optics Training and is a member of the FTTH Council Europe as well as Plumettaz. CTTS has training centers in the UK, Seville, Spain, Central Africa, Rwanda as well as the ability to deliver bespoke training worldwide.

"Plumettaz are a global leader in Cable Jetting Technology and recognise the importance of end user training and technical support for their customers" states Martyn Cook Group Chairman CTTS Group.

Jouni Heinonen, CEO of Plumettaz adds "CTTS acquired a thorough understanding of the challenges in the cable installation. The collaboration with CTTS is one of the best ways to develop the knowledge of the Plumett machines".

PLUMETTAZ Group has subsidiaries in the USA, in China, in The Netherlands and in Switzerland. The company is worldwide known for designing, manufacturing and selling cable-laying machines and accessories for both telecommunication and energy under the trademark Plumett. Plumettaz continuously develops new methods and solutions for the installation of microducts and microcables (FTTx). For further information visit the website at [www.plumettaz.com](http://www.plumettaz.com).

CTTS is renowned for the innovative design and development of its training programmes to fill the skills gaps within the industry, through the delivery of realistic, hands-on training using live systems and state of the art equipment to reflect the workplace environment. CTTS ensures the highest standard of provision with a dedicated team of experienced and fully qualified instructors. CTTS offers a range of international accredited qualifications as well as bespoke training programmes for its global clients.
