

ETTEPLAN OYJ PRESS RELEASE APRIL 22, 2010 AT 10:00 A.M.

ETTEPLAN SIGNS AN EXTENSIVE COOPERATION CONTRACT WITH PLUMETTAZ

Etteplan has signed an extensive cooperation contract with Plumettaz S.A. that makes Etteplan a primary global supplier of engineering services in product development projects and delivery projects for Plumettaz. In addition, the contract covers development of Plumettaz's engineering operations and engineering process management.

The cooperation contract was signed in April and first assignments related to cooperation contract were completed in record time. The first localization project has already been done in China. Cooperation with Etteplan in delivery projects and operation development has also commenced in Europe. Etteplan supplies Plumettaz engineering services to Switzerland and China from Etteplan's units in Finland and China.

Plumettaz chose Etteplan to be its partner because Etteplan can offer a productized service model that effectively helps to support the transfer of product's manufacturing to China.

Plumettaz S.A. is a privately held Swiss company. Its main product areas are cable laying products, tailor made products and suspended access equipments. Plumettaz operates in Europe, Asia and America and has offices in Switzerland, Holland, China and United States.
